 Hyderabad, Telangana

ABOUT ME

Data Analyst with ~2 years of experience in data analysis, ETL workflows, and business intelligence reporting. Skilled in analyzing datasets, building Power BI dashboards, and using SQL to generate actionable insights. Experienced in data validation, reporting, and supporting data-driven business decisions.

SALES PERFORMANCE ANALYTICS DASHBOARD

- Built an interactive Power BI Sales Performance Dashboard to monitor key metrics such as sales, profit, and product category performance.
- Analyzed sales data across regions, segments, and time periods to identify trends and business insights.
- Created dynamic visualizations including trend analysis, KPI tracking, and sales forecasting for data-driven decision support.
- Structured and transformed sales datasets to enable clear reporting, forecasting, and data-driven decision making.

TECHNICAL SKILLS

- **Data & Analytics:** Power BI, Excel, SQL, Talend (ETL), Snowflake
- **Databases:** MySQL, MongoDB, DynamoDB
- **Programming:** Python, JavaScript
- **Cloud:** AWS Lambda, API Gateway, IAM, S3, KMS, Amazon Bedrock
- **Version Control:** Git, Bitbucket
- **Tools:** Postman, insomnia, bitbucket

EDUCATION

B.Tech – Electronics & Communication Engineering
KKR & KSR Institute of Technology and Sciences
JNTUK | 2018 – 2022
CGPA: 7.32 (70%)

CERTIFICATION

- Data Visualization certificate from TATA

EXPERIENCE

Xine Technology Solutions Jan 2025 – Feb 2026

Data Analyst & Software Developer

Inventory Data Analytics & Reporting Dashboard

- Processed inventory and customer transaction data for analytical reporting and structured datasets for visualization.
- Built Power BI dashboards tracking inventory levels, customer counts, recurring customers, and purchasing behaviour.
- Analysed purchasing patterns to identify demand trends and support inventory decisions.

Serverless Case & Workflow Platform

- Collaborated with dev team to design and deploy a scalable serverless inventory management system on AWS, contributing to the development of 10+ production-ready REST APIs with secure IAM-based access control.
- Improved system performance by 25% through database query optimization and effective caching strategies.
- Reduced debugging time by 40% by introducing structured logging, enhanced monitoring, and stronger error-handling practices to improve production stability.

Mphasis Sep 2024 – Dec 2024

Data Analyst Trainee

Customer Analytics Data Pipeline

- Developed an end-to-end customer analytics pipeline processing 100K+ records using Talend for ETL and MySQL, optimizing SQL queries to reduce execution time by 35%.
- Automated data workflows with validation and structured error handling to ensure reliable processing.
- Connected the refined data to Power BI to deliver interactive dashboards supporting data-driven decision-making.
